Puridiom has been a leader in the Procurement field for 24 years and understands the importance of bringing procurement and finance together. Just as technology has improved and streamlined procurement operations, accounts payable is next to experience process efficiencies and gain a strategic alignment with the enterprise.

Electronic Invoice Presentment and Payment (EIPP), the process by which companies present invoices and make payments to one another through the Internet, has become an essential tool for businesses. EIPP systematically and efficiently manages invoice receipt, matching and reconciliation, review and approval, and payment disbursements. Puridiom's EIPP approach transforms a

paper-based, labor-intensive process into a streamlined and strategic focused operation through automation or outsourcing. Either way, Puridiom's EIPP offering delivers Best in Class results.

"Enterprises that invest in technology, outsource, or employ some combination of the two gain a competitive edge over their competitors and are in a better position to proactively manage their business. AP departments that do nothing for another year will continue to lose ground on their competition."
